

Thomas Viola, R.Ph., C.C.P.

PHARMACOLOGY DECLASSIFIED

Mission

The challenge faced by all dental professionals today is the safe and effective management of medically complex patients.

Unfortunately, with the explosion of new drug entities and ever-changing therapy guidelines, many clinicians simply cannot keep up with the latest trends in disease state management and the impact on dental care.

With over 30 years' experience as a pharmacist, dental educator, speaker and author, Tom Viola has earned his reputation as the go-to specialist for delivering quality dental continuing education content through his informative, funny and engaging presentations.

Tom's sellout programs provide an overview of the most prevalent oral and systemic diseases and the most frequently prescribed drugs used in their treatment, along with specific focus on dental considerations as well as strategies for implementing effective care plans.

Knowledge of pharmacology has never been more essential to patient care. Meeting planners agree that Tom is their first and only choice within this specialty.

Bio

In addition to serving his community as a pharmacist, Tom is a member of the faculty of nine colleges and a regular columnist for dental professional journals. Tom serves on the Advisory Board for **General Dentistry** and as the Subject Matter Expert for **Mosby's Dental Drug Reference**. Tom has presented hundreds of continuing education courses, nationally and internationally, in the areas of dental pharmacology and local anesthesia.
